**The compact „spring-time®“ by Aqua Living defines water purification entirely new.**

Simpler to handle than a coffee maker, and as chic as a Jura, the new compact „spring-time®“ serves freshly prepared, natural drinking water of premium kind simply with the push of a button. Expensive water cases, cumbersome carrying and storing - all this can be a relic of the past.

Since „spring-time®“ is a reverse osmosis filter functioning independently of the water distribution network, you only need to place it onto the kitchen counter, insert the plug into the outlet, and everything is readily set up - healthful, pure water, wherever and whenever you want it: whether at home, in the office, in your practice, the store, or even your boat or motor home.

**Today is spring-time®!**

### Advantages to fall in love with:

- + The elegant design flatters any kitchen
- + Compact and easy to handle, just like a coffee maker
- + Removes up to 99.99% of all harmful substances from your drinking water
- + Immediately operational „plug in and use“
- + First reverse osmosis filter independent of water distribution network
- + „Direct flow“ and „freshly pressed“ instead of stored in tanks
- + Exceptionally comfortable and fast filter exchange
- + Constant quality control through conductance value display
- + Electronically controlled operating sequences (incl. cleaning program)
- + Unique mobility (12V/24V connection) also for motor homes, yachts, etc.

**The result is a wonderfully refreshing water indulgence of the finest kind.**

## Health And Vitality

*The pleasure of excellent „spring-time®“ water is something very special.*

*Whoever drank glacier water once, will - without a doubt- immediately recognize this light, slightly sweet and round taste.*

*Natural and pure water is able to fulfill its actual tasks in our body. A natural energy flow is generated.*

*On the one hand, nutrient distribution is optimized in our body, on the other hand, purification is maximized. According to a scientific study by the Center for Health of the German Sport University Cologne, under the supervision of Prof. Dr. Ingo Froböse and in collaboration with the Association for Health Sport and Sport Therapy, the effect of this unique „spring-time® water“ for the human organism was impressively confirmed.*

# 5 Good Reasons

1

### Health:

Once filtered, regular tap water turns into purest and delicious spring water to enhance your health and power performance, just as much as to prevent diseases and premature aging. Each swallow is an increment of health for you and all your loved ones.

2

### Savings:

For just a few Eurocents per liter, you filter the existing tap water, instead of paying high prices for filling, bottles, and transport for bottled water that to some extent is inferior. Simply fulfill one of your wishes with the saved money.

3

### Reliability:

Your innovative „spring time®“ practically removes all pollutants with constantly high quality - whether increasing harmful substance values, decayed condition of the water piping or undetected contamination. Every day - when and where you want it.

4

### Comfort:

No carrying of water cases, no standing in line at the cash register, no deposit money, space savings - because with the compact „spring time®“ you practically have an eternally effervescent spring and therefore delicious and healthy water available anytime. Rather spend the additional free time and space with your family.

5

### Sustainability:

With „spring time®“ you are not only up-to-date, but also are helping actively to preserve the natural resources of our Earth. Threatening drying-up of large headwaters, trucks clogging up the highways, and the unnecessary material and production costs can be further reduced in this manner.

## Technical Information

### Safety through key technology

The inverse osmosis technology in conjunction with pre- and after-filtration is renowned as the most efficient option of water purification amongst experts worldwide.

The water filled into the „spring-time®“ is passing 3 filters: through a combined sediment / activated carbon filter, an inverse osmosis membrane, and a ceramics afterfilter. In this manner, the water is purified from chlorine, pesticides, medical residua, nitrate, nitrite, asbestos, inorganic minerals, radioactive elements, bacteria, viruses, and hormonal residua. The fine pores of the membrane only let through the pure water, minerals in ion form and oxygen.

#### Technology

Prefilter (in two steps): 1.Sediment/  
2.Activated carbon filter  
Membrane : Inverse osmosis  
Afterfilter: ceramics

**Operational voltage** Refer to specification plate  
Power consumption at 230 V  
Activated: 14 W  
Standby: 2 W

#### Housing Substance:

ABS-thermoplastic material

#### Measurements:

Length: approx. 300 mm  
Width: approx. 350 mm  
Height: approx. 300 mm

#### Weight

Filter dry: approx. 6.2 kg  
Filter wet: approx. 8.1 kg

Length of electric cable: approx. 1.3 meters  
Water tank: approx. 1.8 l  
Water production: approx. 100 ml/min  
Approval: CE

## Philosophy

### *Made in Germany*

*Aqua Living develops and produces high-performance and electronically controlled water purification systems that are distinguished through simplest handling, comprehensive security technology, long-lasting serviceability and unique design. A team of highly qualified and motivated product developers, engineers, designers and marketing specialists holistically realized the water purification of the future.*

### *Sustainability*

*„Aqua Living feels obligated to the principles of sustainability. The core of this sustainability is the balance between economical, ecological and social interests and perspectives. As a result of this balance act, Aqua Living created a sustainable product with „spring-time®.“*

*The product avoids production of waste and contributes to a healthy life style. Furthermore, the consumers save cost, since this water treatment is considerably inexpensive in the middle- and long-term. Aqua Living interprets the sustainability principle not as an empty formula or as a pure image factor, but rather as a premise and guiding principle of economic creation.“*

*Dr. Martin Hellwig
